1 to 10 September 1949

3. a. The following observations were made in the BREITENBURG area between 1 and 10 September 1949:

BREITENBURG and vicinity: About 200 heavy JS 122 and Wchuka tanks.

KAMMERBURG area: About 100 tanks.

AMMERSBUCH area: About 50 tanks and 50 self-propelled guns. (N 54/U 91):

Twenty-eight rocket launchers and about seventy antitank guns of about 50 mm caliber were also seen in the training area. All observed tanks had radio installations and revolving turrets.

b. The tanks observed near AMMERSBUCH were parked at a former German improvised airfield. Large-scale wood cutting was done in this area. The tank and artillery firing range being constructed in this area was said to be 6 by 12 1/2 miles.

c. Tanks participating in the BREITENBURG (N 54/U 71) - BREITENBURG (N 54/U 81) area and later on also in the area of AMMERSBUCH - DOULAKRUG (about 9 miles southeast of BREITENBURG) had been detrained in BREITENBURG and were also entrained there upon completion of the field exercises. \*

Comment:

indicates that component units of both the 6th Gds Recz Div (Cadre) and the 25th Tank Div (Cadre) and Hq units of the Fourth Gds Recz Army (Cadre) were still holding their summer maneuvers in the BREITENBURG training area up to 10 September 1949.

of the 12th Gds Tank Div were also sporadically seen in this area. In view of the two cadre divisions and army Hq units practicing in the BREITENBURG area, the reported number of thirty thousand troops is considered too high.

- \* The troops arriving in the BREITENBURG area are believed to have come from military posts. At any rate it is assumed that troops have alternated in going to the BREITENBURG training area during the period of the maneuvers.
